after reducing
on Veneer Services **Butt reducer**

www.VeneerServices.com
PO Box #999, 1130 Eastview Drive,
Franklin, IN 46131
tel: +1.317.346.0711

Features:

- **Benefits:** **1.** Flares are waste, difficult to handle and hold the most dirt — remove them at the beginning of the process, so every step beyond gets easier. **2.** Saves your chipper infeed from being plugged with a flared slab.
- **Fully automated** — one button (the red one) starts the operation. It measures the log and controls the cutter head & bull wheels automatically. (The joystick is optional with the Debarker)
- **Speed** — it only takes seconds per log.
- **Simplicity** — this machine is very easy in operation and maintenance.
- **Support** — our Butt reducer is built and supported from Franklin, Indiana.

Technical specifications:

Maximum flare	48" — 60" (1220—1524mm)
Log diameter, maximum	50" (1270mm)
Log diameter, minimum	8" (203mm)
Log length, maximum	30' (9144mm)
Log length, minimum	7' (2133mm)

What is the Payback?

- Improved Debarking quality & speed
- Improved scanning accuracy
- Improved sawing, slicing & peeling
- Increased Vat capacity
- Less wear & round up time on lathes
- Increased veneer in dryers
- Better transport on log decks & troughs
- Less slabs going to chipper

Let the machine pay for itself:

Lease the Butt reducer from us and let the savings pay for the machine. For the Lease application go to www.VeneerServices.com.

To make the most of your Butt reducer consider a Veneer Services Debarker.
