Veneer Services, LLC
1130 Eastview Dr.
Franklin, IN 46131

Dear Dane,

The complete debarker and butt reducer package purchased from you three years ago has been a very good investment for us. This machine immediately increased our yields of veneer and made every other process easier. Sawing time has been decreased. Flitch cleaning is easier and faster. Veneer runs through the slicers and dryers easier because the edges are so smooth. It is easier to keep the dryers full since we are not taking up space with the log flares. There is no question that this machine helped us be a more profitable mill.

Veneer Services has always been there to support us when needed. We appreciate that you know the industry and you stock the parts and supplies we need.

We are pleased to recommend Veneer Services to the industry and appreciate the good business we have done together.

Sincerely,
David Mathers
President.
