

Double knife guillotine

Features:

Pressure beam and knife beams are of stress relieved cast iron.

Main frame is welded of stress relieved, structural steel plates.

High efficiency hydraulic system.

Touch screen human interface for settings and troubleshooting.

Servo motor positioning of the table for high accuracy.

Independent setting of the knife height at each end.

Safety light screens for operator protection.

Laser lights to indicate each cut line.

Cut to set a size or cut to maximum yield.

Technical specifications:

Model:	DKG 3200
Knife opening:	90mm (3.5")
Veneer widths:	20mm — 530mm
Veneer length:	maximum 3200mm (126")
Press width:	550mm
Main voltage:	as required
Controls voltage:	24 volts DC
Total power required:	9.5Kw
Weight:	9000 kg (19,800 lbs)
Overall length:	4660mm (183.5")
Overall width:	1900mm (74.8")
Overall height:	2100mm (82.7")

Let the machine pay for itself:

Lease the guillotine from us and let the savings pay for the machine. For the Lease application go to www.VeneerServices.com.
